

Gigabit Ethernet Repeater:

Input Device

Output Device

- Extends IP signal using a cost-effective Ethernet cable.
- Signal extension up to 120M over CAT6 (or greater) cable.
- Bandwidth up to 1000Mbps
- Chainable with multiple SR01X for long distance transmission.
- Built-in 8kV (Contact) 15kV (Air) surge protection.

Specification:

Model No : CMTX - EX - 01X

Support:

- Network Bandwidth : 10/100/1000 Mbps (Auto Detection)
- Transmission Distance : 120M
